

Mobile Apps 2024

Assignment 1

Due: 19 March 2024 18:00

<Your Name>

Student no. <Your Student Number>

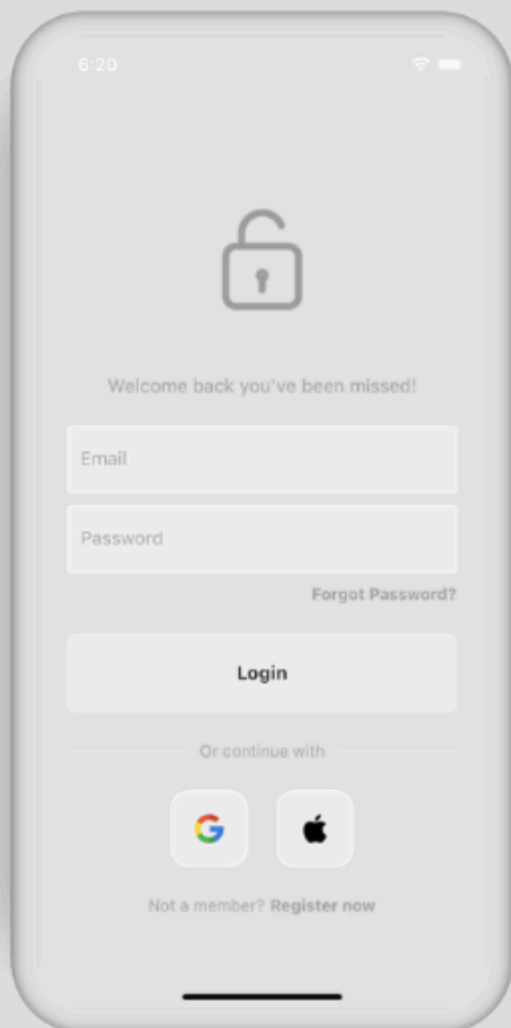

You must make the following mobile app screens. These screens should be made in a single project using Android Jetpack Compose. Your project should have 4 main composeable functions called:

gLogin
gSignUp

bLogin
BSignUp

Your project should use composeable functions and each “widget” should be represented by a composeable function. A widget is a single graphical element. You should define 4 constants to represent the colours used (Light Grey, White, Black and light Black). These constants should be at the start of your file and must be constants. Your project should be called lab1_71234 where 71234 represents your student number. You must submit your project as a Zip into Moodle (not a GitHub link). You are free to include a PDF in your project explaining your work, approach or design. You must choose and source all iconography yourself (no need to cite it).
